

Code-Breaking

Shhh! This secret message can only be read by the cleverest, most super-doooper brainy code-breakers. Can you use your maths skills to work out what it says? Use the chart below to help you.

-\$\ \ €?+\$ \%?= €=~€(*+^ §&*]]";\$=];/

 €&?€?\~\$\$ €~(\$.

This chart shows how often letters usually appear in written English. You can see that the letter 'e', for example, makes up, on average, 13% of all written English, whereas letters like 'j' and 'q' only make up around 0.5% each. How could this help you to decode the secret message?

Answer sheet:

Well done for cracking this super spy code! You are an excellent candidate for Spy School and I shall be recommending you straight away. Now go and celebrate with a large slice of chocolate cake.
